#### MONEY, STOCKS AND BONDS,

Tame and Uninteresting Market, with Very Few Changes at the Close. NEW YORK, July 26.-Money on call was easy, with no loans and no bids what-

Prime mercantile paper 5@612 per cent. Sterling exchange quiet and steady at \$4.85 for sixty-day bills and \$4.8834 for

The total sales of stocks to-day were 43,-878 shares, including the following: Atchison, 1,900; Delaware, Lackawanna & Western, 2,400; St. Paul, 1,500.

The stock market to-day was a tame and uninteresting affair from beginning to end, and the final changes are entirely insignificant, except in Refineries and Citizens' Gas, which stocks furnished no reason for their move-ments. The traders were inclined to sell stocks upon the expectation that the bank statement would show a material loss in restatement would show a material loss in reserve, as it was known that during the early portion of the week the sub-treasury had taken about \$2,000,000 out of the banks. The heavy payments for bonds redeemed, most of which came to New York, did not show in any way up to last night. The sub-treasury was debtor at the clearing-house tc-day, however, over \$6,000,000. Notwithstanding this disposition, there was very little disposition to trade for either side of the account, and the business either side of the account, and the business done was of the hand-to-mouth order, except in Sugar Refineries. In the last hour an attack was made upon it. which forced its price off to 761s. against 777s last evening. A partial recovery followed, but it closed at close to the lowest price, and rose less than I per cent. There was some pressure in New England, and it touched the lowest price of the week, but closed only slightly lower than last evening. The general list showed the heaviness of last evening at the opening, but failed to move more than 18 for a long time, and while the tone continued heavy there was no other movement than those mentioned. The close was rather heavy at a shade under

first prices. Sugar is down 114.
Railroad bonds were also extremely dull and furnished no feature whatever, prices remaining at the same dead level, while only a few issues were traded in.
Government bonds were dull and steady. State bonds were dull and featureless. Closing quotations were:

## TRADING AT CHICAGO.

Heavy Speculation in Everything at a Higher Range of Prices-Hog Products Active.

CHICAGO, July 26 .- A large business was transacted in wheat, and the feeling developed was nervous and unsettled. Prices changed very frequently and rapidly, and ruled higher than the closing figures of yesterday. The opening was 122340 higher than yesterday, and prices advanced 5sc more, then declined 12c under an increased pressure to sell, rallied 15sc, fluctuated somewhat, closed about 1sc higher than yesterday. There was no doubt considerable realizing on the part of the "longs," and "shorts" were frightened and covered freely on the advance. Some advices were received claiming that foreigners were selling at New York. From the Northwest advices were received reporting very hot, dry weather. There was another large day's business transacted in the corn market, and the feeling developed was but a

mand was quite general, both from "shorts" and for investment. Offerings during the early part of the session were small, but after the advance there was free realizing by local "longs." but offerings were well absorbed and the market acted very strong. The signal service reported no rain of consequence in the corn belt, and there was no indication of any, but the weather was reported as cool. The West bought freely today, as did also New York and the East. Local receipts were less than anticipated— 370 cars—and for Monday 535 cars are ex-pected. A good cash demand continued to prevail, notwithstanding the late sharp advance, though the inquiry was less brisk to-day. Oats were active, stronger, with prices generally higher, in sympathy with corn. There was a large general trade in September and the more deferred futures, but operators were disposed to let July and August alone. The first-named month, however, was easier, due to the light demand and decline in the cash market. This also affected August to a moderate extent, but prices advanced 1c. The other deliveries were the favorites, and prices advanced 1c, receded 38@12c, again became firmer, and the close was steady at about outside prices. The sentiment generally was bullish, but news from the outside scarce. There was plenty of good buying orders, however, which had a good effect on values. The hog products market attracted more than usual attention to-day, and speculative trading was quite active, influenced by the firmness in the corn market. The feeling was decidedly strong, and a substantial advance in prices was gained and well maintained on all descriptions of products. "Shorts" were anxious to provide for their outstanding contracts, especially for January delivery, and the orders from outside parties were more liberal than heretofore and largely on the purchasing side of the market. Sellers were somewhat cautious in naming prices, and in many cases the property was read-38@12c, again became firmer, and the close and in many cases the property was readily accepted when offered at what was regarded as extreme figures. Fluctuations were quite wide, and trading on the part of outside parties was rather unsatisfactory. Trading was mainly in September, October and January contracts, the latter attracting more attention than usual and the trad-ing the heaviest so far this season. The

INDIANAPOLIS MARKETS.

The Trade of the Week Closing To-Day Was Very Satisfactory in Its Volume.

INDIANAPOLIS, July 26. In most departments trade in the week closing to-day exceeded in volume the expectations of the early part of the week and was decidedly in excess of the corresponding week last year, as has been the case through the preceding weeks of this month. Dry-goods men are receiving their fall stocks and many of the retail merchants are taking advantage of the early opening to secure the most choice patterns of dress goods. Everything in the cotton line rules firm and in woolen goods there is no indication of weakness. Grocers are having a good trade.
Sugars are moving briskly and coffees
quite freely. The hide market is still advancing in its tendency and more active than at any time in several years past.

The flour market is more active, but prices have not advanced materially as yet, but better prices are indicated. Poultry is weak at quotations. Eggs and choice butter firm. Lemons more plenty and easier. Green apples are in active demand, but light in supply. Receipts of blackberries are liberal, but a considerable per cent. of the arrivals are inferior berries. the arrivals are inferior berries. New po-tatoes and cabbage are scarce and prices firm at quotations given. Other markets are without special feature. GRAIN.

The local market closes in strong position in sympathy with other markets and light receipts. More interest is shown in all medium, 11c; English-cured shoulders, 12 lbs average, 8c; sugar-cured shoulders, 15 lbs average, 8c; sugar-cured shoulders, 16 lbs average, 8c; sugar-cured shoulders, 17 lbs average and over, 11 lbs average, 12 lbs average, 8c; sugar-cured shoulders, 12 lbs average, 8c; s cereals than at any time for many months. Clover Insects.

C. M. Wood, in Miami Valley Farmer. There are two insects that are at work on the clover plant in Ohio now that are of especial interest because of the extent and seriousness of their attacks. The hrst is the clover root borer, which attacks the roots and crowns of the plants, killing them in a short time; and the second is the clover seed midge, which attacks the blossom beads and prevents the formation of

the seed. The adult of the clover root borer is small brown beetle, not over one-fifth of an inch long, which may now be found, in the infested regions, in the roots and crowns of the plant. This beetle desposits eggs about the clover roots, which hatch into small grubs that bore the roots, gradually increasing in size until they become full grown, when they are about one-fourth of an inch long. They then enter the pupa or chrysalis state, and shortly afterward emerge as beetles, like those by which the original eggs are laid.

Where the insect has become established the only remedy is to get but one season's crop from the clover field. Prof. I. P. Roberts, of Cornell University, says that "in central New York of late years we mow the seeded land but once, and pasture in the fall the abundant second growth. Since 1878 the clover root borer has worked upon the clover to such an extent that it invariably fails the second year. This has caused us to change from a five to a fouryear rotation, viz., hay, corn, oats and

The farmers of northeastern Ohio are also adopting a similar plan. Theinjary of the insect does not become especially apparent until the second season.

The adult of the clover-seed midge is a

two-winged fly, not larger than a mosquito. It has at the posterior end of its body a long tube, which is the ovipositor, or eggdepositor, by means of which it inserts its eggs near the center of the clover-heads. These eggs hatch into small orange maggots that attack the blossoms and prevent their development. When full grown these mag-gots are about one-fifth of an inch long. orange in color, and have no legs. When fally developed they drop from the cloverheads to the ground, where they go into the pupa or chrysalis state, and a few weeks later emerge as flies again.

There are three methods of preventing the injuries of this insect to the seed-crop. The first, run the mower through the field about the middle of May, leaving the product on the ground as a mulch and fertilizer. There then dryelops a vigorous crop of clover-blossoms, which comes between the regular crops, and also between the two broods of the midge, thus escaping attack. This has been tried for two or three seasons by some of the most reliable farmers of northern Ohio and pronounced a decided success.

A GOLD "FILLED"

DESCRIPTION OF GOLD WATCH It is the genuine gold-"filled" or "reinforced" case, and patented, and made only by half a dozen manufacturers, and is the same for use and wear as the solid gold case, and may be so considered and treated. Even the costliest watches on the market now have them, on account of their greater strength. With each watch there goes a guarantee by the Manhattan Watch Company to keep it in order for one year free of all charge.

The little post on the left hand stops and starts the watch; the little post on the right hand turns the hands, setting the watch. It need never be opened. It is a ratchet stem-winder, full jeweled balance The back of this watch is exquisitely engraved by

\$7.00.

Description of SILVER WATCH Only \$7.

The face of this watch is precisely the same as that of the gold watch, and the movement is precisely the same. The difference between the two watches is only in the case. The latter is of oxidized silver, acid eaten, very neat and quaint.

The movement is the quick train, with straight line lever escapement, with a direct-acting hand-set that permits accurate setting, and will not allow the hands to move out of position while setting. In the sweep second movement the second hand is run direct from the movement train. rect from the movement train, insuring perfect motion, while the dial train and hands are run by a friction pinion from a side center. This gives all the advantages in time-keeping qualities of the most deheately adjusted and expensive movement.

Each watch is put up in a neat box, padded, to carry it safely through the mails. In the box are carry it safely through the mails. In the box are directions for setting the hands and regulating the watch, with the name of the person at the factory who tested and packed it. If on receipt of the watch it does not regulate or keep time, or is found out of order in any way, it is to be returned to the Manhattan Watch Company, No. 234 Broadway, and it will either be put in perfect condition or a new one sent, FREE OF ALL OHARGE. This guarantee is good for one year, during which the company agrees to keep the watch in perfect running order free of all charge.

The silver case has a direct instead of a ratchet stem-wind, and snap-back instead of a screw-back. The guarantee is the same for both, for the movements are the same.
